Download file to see previous pages Patients with complex care needs, including frail and elderly or those with mental problems, may require continuing care in special housing, residential or nursing homes, and need a 'package of care' to support them back to good health after hospital discharge (McKenna et al, 2000, p.594-601). Such population demands effective discharge arrangements.

Meeting the operational demand for beds. One of the HoEFT's key performance indicators is to promote patient discharge by 1pm. Models used to determine bed capacity management and short-stay emergency care indicate that, if a patient's discharge is facilitated by 1pm, the hospital has sufficient capacity to carry out elective work and accommodate patients admitted as an emergency without ...

Nurse Led Discharge PDF - hoofhealth.ca

Using the Department of Health (2004) and The Agency for clinical innovation (2016) toolkits for criteria-led discharge we developed and agreed local protocols for specific patients and ran a comprehensive training/competency package for senior nurses to enable a new 'Nurse criteria-led discharge service'.

Facilitating an effective discharge from hospital ...

Following the development of key documentation, nurse facilitated discharge was introduced in November 2013 as a six month pilot. The process involved the medical team identifying patients suitable for nurse facilitated discharge and clearly defining criteria to be met along with an appropriate time frame for attainment thus allowing the nurses to facilitate the discharge.

Criteria nurse-led discharge | NHS Improvement

The study was presumably carried out at a 19-bed unit in a single hospital. The patients were followed until hospital discharge. The nurse-to-patient ratios and the proportions of qualified staff were comparable between the intervention and the control groups. The rate of follow-up was 90% in the intervention group and 91% in the control group.
