purpose for carrying out a
nursing intervention.

Nursing interventions are
actions that nurses perform
to help patients achieve
specified health goals.

How to Write a Nursing

Rationale | Career Trend

One of the most common form
of dementia affecting the
elderly population is
Alzheimer's disease. It is
an irreversible and
progressive disease that can
lead to a fatal condition at
the late stages. AD usually
affects people 60 years and
older, with the risk of
having the disease rising
significantly higher as the
person gets older.

Nurses Pocket Diagnoses
A strong foundation in
nutrition is essential for
effective nursing practice.

Reflecting the latest
evidence-based practice and
nutrition recommendations,
this eighth edition of Susan
Dudek's highly respected
text maintains its focus on
all steps of the nursing
care process, from
assessment and nursing
diagnoses to implementation
and evaluation.
