This article reviews the use of concept mapping as a person-centred problem-solving aid to assessment, risk management, care evaluation and care planning for nurses. Concept maps are diagrams that are used to organise, represent and create knowledge, and provide a useful framework for critical analysis and problem solving.

Care Plans and Care Maps - Student Nurse Journey

Used to organize information, the concept map often has a hierarchical structure which helps students examine their thoughts and actions as they relate it to the care of the client and the nursing process. Because concept maps represent a picture of what's in the student's mind, they are unique creations that more or less represent reality.
