because it provides local file-system semantics.

Setting up an O2CB Cluster with Dual Primary ... - Lisenet

When using the Oracle Cluster File System version 2 (OCFS2) for the Linux RAC environments' shared storage, Oracle provides a series of command line utilities for managing OCFS. The first, `ocfs2console`, launches a simple GUI screen (Figure 4.5) to perform key fundamental OCFS administrative tasks.

OCFS2 | High Availability Guide | SUSE Linux Enterprise ...

An OCFS2 installation consists of two parts, the kernel module and the tools module. The supported version of the OCFS2 kernel module depends on the version of Unbreakable Enterprise Kernel available with Oracle Linux 7. Run the following command to install the latest version of the OCFS2 kernel module:

```
# yum install kernel-uek ocfs2
```

Oracle® Linux 6 Administrator's Guide

Ocfs2 is a general purpose shared disk cluster file system for Linux. The clustering capabilities allow for better performance via parallel node I/O as well as high availability - if one node goes down, the cluster will recover it and continue.

OCFS2 | Administration Guide | SUSE Linux Enterprise High ...

OCFS2 is a general-purpose shared-disk cluster file system for Linux capable of providing both high performance and high availability. As it provides local file system semantics, it can be used with almost all applications.

OCFS2 Best Practices Guide | Oracle Community

OCFS2 Cluster File System Setup Guide in Linux What is OCFS2? OCFS2 is a shared-disk cluster file system for Linux Capable of providing both high performance and high availability.

OCFS2 - A Cluster File System For Linux

The aim of this guide is to be a starting point for users looking to use the OCFS2 file system. First time users should be able to jump to the Getting Started chapter to learn how to configure, format and mount the volume. Users looking to upgrade from an earlier release must refer to the chapter on New Features and review the sections on

Ocfs2 Guide

OCFS2 Best Practices Guide the blocks of the other nodes are changing, those nodes are considered alive. If there is no response, the time-out timer starts and will mark the node as not responding when the timeout value is reached. OCFS2 uses the network in addition to a separate disk based heartbeat to determine if nodes are alive

Oracle® Linux 7 Administrator's Guide

OCFS2 is a general-purpose shared-disk cluster file system for Linux capable of providing both high performance and high availability. As it provides local file system semantics, it can be used with almost all applications.

Project: OCFS2 - oss.oracle.com

OCFS2 is a useful clustered file system that has many general purpose uses beyond Oracle workloads.

Download Ebook Ocfs2 Guide

Utilizing shared storage, it can be used for many general computing tasks where shared clustered storage is required. Its high performance and clustering capabilities set it apart from many other network based storage technologies.

Installing OCFS2 - Oracle Help Center

Now, copy the cluster configuration file `/etc/ocfs2/cluster.conf` to each node in the cluster. Configure the Cluster Stack. If you follow an "Oracle Linux Administrator's Guide for Release 7", you'll see the following command defined to configure the cluster stack: `# /etc/init.d/o2cb configure`
