Okuma 454 alarm code help? -
Practical Machinist
Strange how its an M code on a mill and a G code on a lathe. I could see it being different numbers, but swapping between letters is just weird. Correct me if I'm wrong, the VDOUT afterwards is what triggers the alarm (red light and halt of program), where the 3 numbers dictate what level alarm it is, and the VUACM creates the message, which is designated by what is in the ' ' marks.
