Hello, I'm looking to
see if anyone has a

Get Free Okuma Lb 10 M Code

post processor for an Okuma LB3000EX MYW with one turret. The controller is a OSP-P200L, there is a Main Chuck and Sub Chuck. There is a post processor for the LB3000EX in the forums, but it does not work for me. Thank you.

Codes - Helman CNC
extra info:. All the letters but G and M come right before specification values - a G or M followed by a number will trigger a specific type of behavior while any other letter followed by a number specifies a rate, offset, position, or other such thing.

@Wade that seems
strange (not arguing

Get Free Okuma Lb 10 M Code

either, just discussing)
I have run at least 10
different Okuma
lathes and none of
them would wait. ON
yes but up to speed
no. ... (ignore Spindle
rotation M code
answer) on your rapid
move to the part and
on the RPM call out
line/block.

Okuma Program
Format
M Codes Specifying
Thread Cutting Mode
The thread cutting
mode is specified with

Get Free Okuma Lb 10 M Code

an M code. The correspondence between modes and M codes is as follows:

M32 : Straight infeed along thread face (on left face)
M33 : Zigzag infeed
M34 : Straight infeed along thread face (on right face)

When none of these M codes is specified, the control automatically selects

Get Free Okuma Lb 10 M Code

the M32 mode.
