In the middle of a 7,300 mile circuit of North America in 2011, we discovered that the Onan MicroQuiet 3600LP generator in our 2006 Itasca Navion wouldn't start. We had not run it in many months (we are infrequent generator users). Online research eventually revealed a common cause: a restriction of the "regulator vent hose" on the generator.

Onan Generator Stops Running When Hot. Once again there are several possibilities for when this issue takes place. One possible cause, according to the handbook, is that the airflow is restricted and the engine is not getting cooled fast enough. The reasons behind this possibility are that there is some debris blocking the inlet or outlet ports.
