Any help you can give me would be appreciated. Junior Jones

ONAN ENGINE TEARDOWN

I have an 18 hp onan engine on a late model AEAD-200LE that is
doing something goofy. The engine is running slow for starters,
both low and high idle are about 1000 rpm below where they should
be. The governor is "hunting" for the right throttle setting. RPM
fluctuates greatly. This can be stabilized by adding choke and
manually pushing the governor arm into a higher throttle position.
