RESEARCH ARTICLE Open Access Hypertension awareness, treatment and control in Africa: a systematic review James Kayima<sup>1\*</sup>, Rhoda Achille Katamba<sup>3</sup>, Elli Leontsini<sup>4</sup> and Fred Nuwaha<sup>2</sup> Abstract Background: Inadequate diagnosis and suboptimal control of hypertension is a major driver of cardiovascular disease in Africa.

RESEARCH Open Access Prevalence, awareness, treatment and control of hypertension ...

Prevalence of hypertension The mean systolic and diastolic BP results were 120.2mmHg ( $\pm$ 19.6 SD) and 72.4 mmHg ( $\pm$ 10.5 SD). The overall prevalence of hypertension was 28.3% (95% CI: 24.9-31.7), slightly lower in men (26.0%) than women (30.3%) though the difference was not statistically significant ( $\chi^2=1.57$ , P= 0.211). Among all hypertensive people
