S.T.S Holmström, I Qm, and H. Urey, "An ophthalmic multifocal diffractive lens." European Patent Specification 3435143B1 (1 April 2020). International Organization for Standardization, ISO 11979-2:2014 "Ophthalmic Implants - Intraocular Lenses - Part 2: Optical Properties and Test Methods," Geneva: ISO. (2014).

Intraocular lenses (IOLs), Injectors, BSS & OVDs: Variety ...
Intraocular lenses have been used since 1999 for correcting larger errors in near-sighted, far-sighted, and astigmatic eyes. This type of IOL is also called phakic intraocular lens (PIOL), as it is implantated without removing the patient's natural crystalline lens.. Phakic IOL appear to be less dangerous than excimer laser surgery (LASIK) in those with significant nearsightedness.
