TimesTen In-Memory Database FAQ - Oracle

Welcome. The Oracle TimesTen In-Memory Database provides application-tier database and transaction management built on a memory-optimized architecture accessed through industry-standard interfaces. Optional data replication and Oracle caching extend the product to enable multi-node and multi-tier configurations that exploit...

TimesTen - Wikipedia

Oracle TimesTen In-Memory Database TimesTen to TimesTen Replication Guide (Part Number E13072). This guide provides background information to help you understand how Oracle TimesTen replication works and step-by-step instructions and examples that show how to perform the most commonly needed tasks.

Oracle TimesTen In-Memory Database

Oracle TimesTen In-Memory Database (TimesTen) is a memory-optimized relational database that empowers applications with the responsiveness and high throughput required by today's real-time enterprises and industries such as telecom, capital markets and defense. Oracle In-Memory Database Cache (IMDB Cache) uses the Oracle TimesTen In-Memory Database as its RDBMS engine.

Space: TimesTen In-Memory Database | Oracle Community

The Oracle TimesTen In-Memory Database is an in-memory relational database in which all data is located in random access memory . An in-memory database has faster query and response times compared to a database that requires frequent access to data on hard disks.

Oracle TimesTen In-Memory Database Documentation

The features are documented in the Oracle TimesTen In-Memory Database Scaleout User's Guide. TimesTen Scaleout supports a maximum of 64 instances in this release. NOTE: Oracle TimesTen In-Memory Database "in classic mode" or "TimesTen Classic" refers to single-instance environments and databases as in previous releases.

Oracle TimesTen In-Memory Database

Oracle TimesTen In-Memory Database (TimesTen) delivers real time application performance (low response time and high throughput) by changing the assumptions around where data resides at runtime. By managing data in memory, and optimizing data structures and access algorithms accordingly, database operations execute with maximum efficiency achieving dramatic gains in responsiveness and throughput.

What is Oracle TimesTen In-Memory Database? - Definition ...

Oracle TimesTen is normally deployed at application tier (middle tier). For existing databases, it can be deployed as in-memory cache database and can be automatically synchronized. It caches...
