This Road Note replaces the 1983 version of Road Note 6 and the recommendations given in Section 7.3.6, Chapter 7, Volume V of the Civil Engineering Manual as the standard for road pavement drainage design. 2. Background . 2.1 Road Note 6 was published in 1983 a nd was based on Transport Research

### ROAD NOTE 6 ROAD PAVEMENT DRAINAGE

The Road Note complements and, in many parts, also updates Overseas Road Note 31 (TRL, 1993 which gives recommendations for the design and construction of new road pavements but which also includes chapters on the design of pavement layers). The methods of design that are described in this Road Note remain firmly based on practical experience.

ORN5: A guide to road project appraisal. - GOV.UK

ACKNOWLEDGEMENTS This edition was based on an earlier document, Road Note 40, on axle load measurement using a portable weighbridge. The new Overseas Road Note has been expanded to include traffic counting in addition to axle load survey procedures and was produced by the TRL team of Dr John Rolt, Nigel Hewitt, Linda Parsley and Nick Elsworth.

Road Note 40, similarly, is an ' honorary ' ORN that still carries its original RN number (but see below). The Overseas Road Notes mostly remain current for many years and do not require regular updating. However, they are revised when necessary. ORN 3 was recently revised and is now published in its second edition. RN 40 is currently under ...

TRANSPORT NOTES - gov.uk

based on the empirical approach laid down in the United Kingdom Road Note 29 of that time. In view of the rapid progress of major road projects and the growing number of heavy goods vehicles in the territory, a revised version of road pavement design (known as Road Note 1) was promulgated in 1983. It was intended to design more robust and

Overseas road note 29 pdf - WordPress.com

In Many countries road traffic is growing rapidly in volume and in size and weight of the vehicles using the roads. As a consequence, highway engineers concerned with designing new roads or the strengthening of existing roads require reliable information about the distribution of axle loads for existing traffic as well as information on national or regional axle load trends.
