The Oxford hip and knee scores are widely used patient-reported outcome measures (PROMs) in research, audit, and clinical practice. In addition to their appropriate development, PROMs used in the context of arthroplasty should have well-established measurement properties, assessed in that context, such as evidence of validity, reliability, and responsiveness.

Oxford University Press - homepage

INTRODUCTION. Endometrial stromal sarcoma (ESS) is a rare malignant neoplasm that is known to originate from the endometrial stromal cells. ESS accounts for only 0.2% of all uterine malignancies, for this reason it may sometimes be misdiagnosed as other more common types of malignancies [].The world health organization has recently reclassified ESS to low-grade ESS (LG-ESS), high-grade ESS (HG ...
