Chamber music is a form of classical music that is composed for a small group of instruments—traditionally a group that could fit in a palace chamber or a large room. Most broadly includes any art music that is performed by a small number of performers, with one performer per part (in contrast to orchestral music, in which each string part is played by a number of performers).

Tin is a chemical element with the symbol Sn (from Latin: stannum) and atomic number 50. Tin is a silvery metal that characteristically has a faint yellow hue. Tin is soft enough to be cut with a knife. When a bar of tin is bent, the so-called "tin cry" can be heard as a result of twinning in the crystals; this trait is shared by indium, cadmium, zinc, and frozen mercury.
