2009 [4]. Surgical resection remains the only chance for cure, but despite this and standard chemotherapy, the 5-year survival rate for resected disease is less than 30% [5].

Current concepts and novel targets in advanced pancreatic ...

Pancreatic cancer begins in the tissues of your pancreas – an organ in your abdomen that lies horizontally behind the lower part of your stomach. Your pancreas releases enzymes that aid digestion and hormones that help manage your blood sugar. Pancreatic cancer typically spreads rapidly to nearby organs. It is seldom detected in its early stages.

Pancreatic Cancer Current Concepts In

Current pancreatic cancer models are similar to that of colon cancer, in which there is a progression from precancerous lesions to invasive carcinomas. Pancreatic cancer evolves from normal ductal epithelium, to pancreatic intraepithelial neoplasms/ductal lesions, to invasive adenocarcinomas [27;28]. The ductal epithelium undergoes changes that are characterized by PanIN-1A.
