Printmaking - ZartArt
Lithography (from Ancient Greek ?????, lithos 'stone', and ???????, graphein 'to write') is a method of printing originally based on the immiscibility of oil and water. The printing is from a stone (lithographic limestone) or a metal plate with a smooth surface.It was invented in 1796 by German author and actor Alois Senefelder as a cheap method of publishing theatrical works.

Printmaking Paper. The distinguishing features of a good printmaking paper are its ability to withstand soaking and to absorb a lot of ink, often with multiple runs through a press, without disintegrating or deforming. Fine printmaking papers are made from archival fibers, which in the European printmaking tradition is usually 100% cotton.

Linocut technique - Notes and Queries - LinocutBoy
Place paper on plexi and rub lightly. Peel away paper. Method 1B. Using the brayer, roll ink onto the plexiglass, covering it completely. Place paper over plexiglass. Using a pencil, draw an image on the paper. When you peel away the paper, the image will have transferred itself. This is very similar to using carbon paper. Method 2

Paper & Ink Workshop: Printmaking techniques using a ...
I would say the most important things are inking and what paper you use. You need a good quality ink, a relief printing ink for professional artists. It should have good density of colour and be quite sticky when you roll it out. You will need quite a lot of ink. It is best to build it up in thin layers so that it doesn't fill in the carved ...
