Integration of torrefaction and CHP plant: Operational and ...
Industrial scale torrefaction can add significant value to existing forestry businesses and has the power to transform the economics biomass-to-energy supply chain. To understand the benefits, risks, investment requirements and potential process changes, feasibility studies are a cost effective way to evaluate a business case. With our ...

Integration of torrefaction and CHP plant: Operational and ...
The second thing to consider in torrefaction economics is the power balance, or how much energy is needed to convert biomass into biocoal. "This is a function of your reactor technology," van der Burg explains. "In our case, it's only 2 to 2.5 percent of the total energy output. In other words, if 1 ton of product has 6 megawatts (MW ...

Torrefaction Benefits - IBTC
At present, the cost of biomass torrefaction is higher than coal. However, it can be significantly reduced by the implementation of carbon credits market, increasing torrefaction plant equipment size, and empirical cumulation. Later, more attention should be focused on application demonstration and systematic economic optimization.
