There are a few paid-for books though, and there's no way to separate the two

Nerve Blocks for Pain Relief: Types, Side Effects, and Uses

In ultrasound-guided peripheral nerve blocks, color Doppler mode is used to detect the presence and nature of the blood vessels (artery vs. vein) in the area of interest. When the direction of the ultrasound beam changes, the color of the arterial flow switches from blue to red, or vice versa, depending on the convention used (Figures 13, 14A, 14B, and 14C).
