Energy and Power Generation Handbook

We use natural gas as a fuel and to make materials and chemicals. How did natural gas form? Millions to hundreds of millions of years ago and over long periods of time, the remains of plants and animals (such as diatoms) built up in thick layers on the earth's surface and ocean floors, sometimes mixed with sand, silt, and calcium carbonate.

Practical Electricity Made Easy | Book - English

Copper has a very "low resistance" to the flow of electricity. Copper carries very large amounts of electricity or "current" with ease. For instance, if you took a piece of copper wire and stuck one end into each side of a normal 110 VAC socket, current would flow. In fact, a lot of current would flow.
