The Nikon D850 is perhaps one of the most advanced DSLRs made by Nikon to date. As a result, it comes with a lot of controls and menu settings that might be confusing for many photographers out there. In this article, I will provide information on what settings I personally use and shortly explain what some of the camera buttons and controls do.

## Image Stabilization: When to Use it and When to Turn it Off

If light levels change and the shutter speed  
required to achieve the correct exposure is  
beyond the shutter speed range of the  
camera, ISO Auto will increase the  
sensitivity. \*As the shutter speed range of  
a D-SLR is very large, it is rare that a  
shutter speed beyond the range of the  
camera (i.e. 30 sec) will occur under  
normal lighting conditions.
