- Part 1 - Introduction with ...

What are the Types of API?

***There are two types of heavily
used APIs for web services:***

***SOAP and REST. Google is one
of the major players with a
SOAP based API while Yahoo
(and most of their recent***

acquisitions) have taken the REST approach. More often than not, a “Web 2.0” service you come across today will probably be using REST.

***PHP Geolocation Web Service
- Geoplugin***

REST is much easier and more widely used than SOAP (about 70% web services API uses REST API) and is the newcomer to the block which seeks to fix all problems with SOAP. In this tutorial, I will show you the easiest method
