Vampire squid are found in temperate and tropical deep-water zones worldwide at depths of 600 to 1200 m (1958 to 3937 ft). The water temperature at those depths is very cold, 2-6o C (35.6 to 42.8 o F). This is the OML (oxygen minimal layer) where there may be less than 5 percent oxygen saturation and little or no light.

Food allergies are a growing food safety and public health concern that affect an estimated 8% of children in the United States. 1 That's 1 in 13 children, or about 2 students per classroom. A food allergy occurs when the body has a specific and reproducible immune response to certain foods. 2 The body's immune response can be severe and life threatening, such as anaphylaxis.
