A plant has two organ systems: 1) the shoot system, and 2) the root system. The shoot system is above ground and includes the organs such as leaves, buds, stems, flowers (if the plant has any), and fruits (if the plant has any). The root system includes those parts of the plant below ground, such as the roots, tubers, and rhizomes.

Plant Structure

about the internal structure or the anatomy of the plant. Cells of the same kind and/or function form tissues like the epidermis, cortex and vascular tissue. Each tissue has a specific function in the plant organ and when we are talking about the function of the leaf, we must actually refer to the function of each kind of tissue
