Bluetooth is a wireless technology standard for exchanging data over short distances using radio waves (near field). This standard is designed for built-in networking functions in mobile devices which can be used to connect mobile devices like mobile phones, personal digital assistants, and laptops to each other without the need of a cable. Bluetooth is a short-range wireless technology standard that uses radio waves to connect mobile devices like mobile phones, personal digital assistants, and laptops to each other without the need of a cable. Bluetooth is a short-range wireless technology standard that uses radio waves to connect mobile devices like mobile phones, personal digital assistants, and laptops to each other without the need of a cable.
