North American Lizards From The  
Sceloporus Genus

General Description: Plateau Fence Lizard (*Sceloporus tristichus*) are small lizards (total length to about 6 inches) with fairly coarse scales. The dorsal pattern ranges from longitudinal stripes to broken crossbars, but the dorsal pattern usually is a gray-brown background with broken brown crossbars.

Plateau Fence Lizard - Sceloporus tristichus Abundance ...

Plateau Fence Lizard (Sceloporus tristichus) These insectivorous lizards inhabit cold desert and submontane zones. They require rocky, deep soil areas in shrub or forested habitats with lots of openings to allow basking. They have gray to brownish colored bodies with faint dorsal and lateral blotches.
