Finally, replace your water jug with a new, unopened one. If you store your spare water jugs for any significant length of time, you would be wise to test the water in both the jugs and your dispenser periodically for impurities. This is particularly important if you store the jugs in a basement or garage and you live in a more humid climate.

*Water Cooler Troubleshooting Guide*

*• It is normal for the dispenser or water bottle to shake when the cooling system cycles off. • Some operating noise from the compressor and hot tank is normal. 12. Wash your hands thoroughly with soap and water for at least 20 seconds. Install a full water bottle on the dispenser. Dispense water through the hot and cold spigots.*
