market-based instruments (MBIs) are policy instruments that use markets, price, and other economic variables to provide incentives for polluters to reduce or eliminate negative environmental externalities. MBIs seek to address the market failure of externalities (such as pollution) by incorporating the external cost of production or consumption activities ...

instruments largely determines the policy success. That is why environmental economists, Pearce (1990) and Repetto (1988), suggested policy intervention and financial compensation to prevent the rain forest destruction. Muzondo et al. (1990) and Nuppenkamp (1992) discussed ...

Environmental Treaties and Other Policy Instruments

Policies have a key role in determining, and improving the state of our environment. European environmental policies have developed significantly since the first Environment Action Programme was decided in 1973. Since then several hundred legal acts addressing environmental issues have been adopted.

policies were first developed, many policy instruments focused on specific environmental problems. Since no single policy instrument can provide solutions to all problems, the spectrum of policies has broadened gradually to address increasingly complex environmental and health related problems. Today, many environmental policy interventions combine:
