The setting under Device Manager Power Management tab Allow the computer to turn of this device to save power has no effect on Wi-Fi power management. The setting only affects how Windows and the device driver handle the device power-down during suspend and hibernation. We recommend keeping the default value checked for the setting:

Welcome to Empower Wisconsin

The Alliance For Wireless Power is an industry standard group that uses the principles of magnetic resonance to develop a wireless energy transfer system over distance. The WiPower system uses directed and controlled magnetic fields to replace traditional power cords. To do this, the transmitter utilizes one or more primary windings in order to induce an even magnetic field above its surface.
