12. They Called It LISP for a Reason: List Processing. Lists play an important role in Lisp--for reasons both historical and practical. Historically, lists were Lisp's original composite data type, though it has been decades since they were its only such data type. These days, a Common Lisp programmer is as likely to use a vector, a hash table, or a user-defined class or structure as to use a ...

They Called It LISP for a Reason: List Processing

New to Common Lisp and can't understand why the defun function is not working in simple case. In Chapter 3 of "Practical Common Lisp," we are asked to create a CD database by creating the function make-cd which is defined as follows: (defun make-cd (title artist rating ripped) (list :title ...
