Prehistoric Life: The Definitive Visual History of Life on Earth This is a sumptuous and learned book. But it is also unreadable. It serves as a visually beautiful reference book, and a thick-volume to be thumbed through, read in parts, consulted, and used as a stimulus to the sense of wonder.

### PREHISTORIC LIFE - YouTube

Prehistoric Life Scientists believe that the earliest stages of human evolution began in Africa about seven million years ago as a population of African apes evolved into three different species: gorillas, chimpanzees, and humans. Some three million years later early humans stood nearly upright and had developed larger brains, about half the size of the modern brain.
