Ronald Fisher - Wikipedia

The design of experiments (DOE, DOX, or experimental design) is the design of any task that aims to describe and explain the variation of information under conditions that are hypothesized to reflect the variation. The term is generally associated with experiments in which the design introduces conditions that directly affect the variation, but may also refer to the design of quasi-experiments ...

Datos agrupados: ejemplos y ejercicio resuelto

Una variable aleatoria tiene una distribución uniforme continua si la probabilidad de que tome un valor, dentro de un intervalo finito $[a,b]$, es la misma para cualquier sub-intervalo de igual longitud.
