This is a fine starting point for learning basic probability theory (or better, as a refresher) but is inadequate as a stand-alone preparation for the exam. The review questions (and solutions) available online are a better representation -- though not perfect, as Exam P has fewer but harder questions than Exam 1 -- of what to expect on the exam.

Probability – A risk is an event that "may" occur. The probability of it occurring can range anywhere from just above 0 percent to just below 100 percent. (Note: It can't be exactly 100 percent, because then it would be a certainty, not a risk. And it can't be exactly 0 percent, or it wouldn't be a risk.)
