Profen 5 W W Gel

Ibuprofen, like other 2-arylpropionate derivatives such as ketoprofen, flurbiprofen and naproxen,
contains a stereocenter in the α -position of the propionate moiety. The product sold in pharmacies is a
racemic mixture of the S and R-isomers. The S (dextrorotatory) isomer is the more biologically active;
this isomer has been isolated and used medically (see dexibuprofen for details).

The α -amylase activity was determined using starch (1%, w/v) as a substrate (Decker & Manual, 1977). The amount of reducing sugar (estimated as maltose) released was measured using 3, 5-dinitrosalicylic acid (Miller, 1959). One unit (U) of enzyme activity is defined as the amount of enzyme required to release 1 μ mol of reducing sugar per ...
