If they're on sale in both the Amazon and Google Play bookstores, you could also download them both.

GitHub - HackerShackOfficial/Autonomous-Follow-Me-Cooler ...

Like so many creative projects, Follow me / #followmeto began rather serendipitously. Photographer Murad Osmani and his partner Nataly Zakharova are passionate travellers but Nataly was growing frustrated with Murad always being preoccupied with his camera wherever they went. She literally resorted to dragging him by hand from place to place to keep them moving.

Project Follow Me

Overall project idea Follow.Me aims to satisfy people's desire - mainly family members and doctors - of monitoring the position of elderly people with different forms of dementia and Alzheimer, in order to prevent danger situations. There is nothing more frightening than losing a loved person. Satellite tracking devices can help quickly locate missing people.

Girlfriend Continues to Lead Photographer Around the World

DIY Smart Follow Me Drone With Camera (Arduino Based): Drones are very popular toys and tools these days. You can find professional and even beginner drones and flying gadgets in the market. I have four drones (quadcopters and hexcopters), because I love everything that flies, but the 200th flight isn't...
