This paper discusses different forms that business ethics has taken in relation to the goal of businesses acting ethically. In the end, it maintains that a major challenge current business ethics faces is the lack of an account of business organizations as they ethically develop and change both individually and systemically within social and political conditions.

Prospects for an Ethics of Self-Cultivation

Globalization has enormous implications. As convergence of technologies facilitated people to connect, people not only communicated but also started collaborating. A flat world that facilitates multiple forms of collaboration in sharing knowledge and work among billions of people without regard to geography, distance or language poses new challenges and problems for lawmakers and judges.

Applied and Professional Ethics - prospects.ac.uk

The book is less concerned with absolutist understandings of the two components of ethics, a theory of 'the good' and a theory of 'the right', than with remaining open to multiple relations between ideas about the built environment, design practices and the plurality of kinds of human subjects (inhabitants, individuals and communities) accommodated by buildings and urban spaces.

Prospects For An Ethics Of Architecture

Rule-based ethical theories like Kant's appear to be promising for machine ethics because of the computational structure of their judgments. Kant's categorical imperative is a procedure for ...

Prospects For An Ethics Of

Bringing together the reflections of an architectural theorist and a philosopher, this book encourages philosophers and architects, scholars and designers alike, to reconsider what they do as well as what they can do in the face of challenging times. It does so by exploring the notion that architecture and design can (and possibly should), in their own right, make for a distinctive form of ...
