Hi there. There are two different locations that the purge valve was located at, depending on the vehicle type. The first location would be on the engine intake next to the throttle body on the left side when viewing the engine from the front of the vehicle. The other location is behind the fuel tank under the vehicle next to the charcoal canister.

**@dandyoun Take a look at the the
vent valve and the lines. the purge
valve would have nothing to do with
that issue and its under the hood.
the vent valve is under the bed area.
sometimes the charcole canister
gets stopped up and will cause that
issue also. @judge those
componets are not unique to a ford
v10 practically every gas burning
vehicle on the road has them.**
