Goo is a Python based extension to the popular open source animation software Blender. Our plan is to extend the rich physics simulation and GUI of Blender to allow for cell based simulation of tissues and embryos. Potential projects include simulating epithelial morphogenesis, pattern formation, and embryonic growth.

Chicago is a 1975 American musical with music by John Kander, lyrics by Fred Ebb, and book by Ebb and Bob Fosse. Set in Chicago in the jazz age, the musical is based on a 1926 play of same title by reporter Maurine Dallas Watkins, about actual criminals and the crimes on which she reported. The story is a satire on corruption in the administration of criminal justice and the concept of the ...

The dysregulation of cell death is highly relevant to tumorigenes but the relationship between cell death and cancer is complex. Multiple types of cell death exist and can co-occur to various degrees. Cell death can be categorised into programmed cell de (PCD) or non?PCD based on associated signalling pathways.

Single-cell analysis of human non-small cell lung cancer ...
Introduction. Immune checkpoint blockade targeting the PD-1/PD-L1 axis is the first-line therapy for a majority of patients with metastatic and locally advanced non-small cell lung carcinoma (NSCLC) (Remon et al., 2020). Although checkpoint blockade agents have improved overall survival (OS), most patients do not realize clinical benefit and still may experience physical and financial toxicity.

Besca, a single-cell transcriptomics analysis toolkit to ...
Leader et al. provide the largest NSCLC cohort analyzed by scRNA-seq and CITE-seq, demonstrating shared and variable elements of the treatment-naïve immune response and identifying independent immune-modifying effects of tumor mutational burden and TP53 mutation, resulting in a refined model of how neoantigens, driver mutations, and immune state combine to drive immunotherapeutic response.

Single-cell analysis of human non-small cell lung cancer ...
It supports its member firms through a variety of options like contracted projects, capstone projects, and case studies. For case studies, the client firms outline the business problem, provide datasets for graduate students to analyze, and upon completion of case study projects both clients and students submit feedback forms.
