This component consists of a transmission control unit and engine control unit. After diagnosing the code p0541, you may find the issue is related to PCM. However, you can get the proper solution by replacing the PCM component.

American Express

hey guys. i have a 2001 466 that looses power. inj pressure is 450 at idle, oil pump at crank is 40lbs at idle. checked for active and inactive codes came up with controller 1 abnormal frequency. sid:254 fmi:8. That code usually means there is a problem with the power connections to your ECM which could be anything from loose battery.
