Having a look at radial engines used in aircraft. Please support my next project <https://www.patreon.com/vliegnet> The engines we are looking at is: Armstrong...

Radial Engine

The radial engine is a reciprocating type internal combustion engine configuration in which the cylinders "radiate" outward from a central crankcase like the spokes of a wheel. It resembles a stylized star when viewed from the front, and is called a "star engine" in some languages (German Sternmotor, French moteur en étoile, Japanese ?????? (hoshigata enjin), Italian motore stellare).
