The trick with ratios is to always multiply or divide the numbers by the same value.

Ratios - mathsisfun.com

When we compare the relationship between two numbers dealing with a kind, then we use the ratio formula. It is denoted as a separation between the number with a colon (:).

Sometimes a division sign is also used to express ratios. For example, we are making a cake, then the recipe sometimes says to mix flour to water in the ratio 2 part 1.
