Renewable energy resources offer cleaner alternatives to fossil fuels. They are not completely problem-free, but they produce much less pollution and fewer greenhouse gases, and by definition, will not run out. Here are our main sources of renewable energy: 01. of 07.

Center for Resource Solutions | Advancing Sustainable Energy

Renewable energy costs have fallen significantly and rapidly since 2007, based on dramatic improvements in the cost-competitiveness of renewable-based power generation technologies. With this increasingly favourable cost equation, the world ' s shift to a sustainable energy future based on renewables makes sense in purely economic terms.
