Riverboat Simulator Activity Sheet

Riverboat Simulator Activity Sheet Purpose: The purpose of this activity is to analyze the relationship between the two vector components of motion for a river boat as it travels across a river in the presence of a current. Procedure and Questions: 1. Navigate to the Riverboat Simulator page and experiment with the on-screen buttons in order to gain familiarity with the control of the animation.

Chegg Study Questions and Answers | Chegg.com

A food chain is an organized series of living things linked together by an alimentary (food related) relationship. Animals draw the energy needed for survival from their food. At the base of such a chain one finds the producers. These are terrestrial plants or aquatic ones (algae, phytoplankton). They make their own organic matter from nutrients, CO₂, and light (photosynthesis).
