Program ' s objectives Training in mechanical engineering is at the same time broad and very specialized. It includes solving both challenging problems, such as computing the fluid flow around an airplane or optimizing a hip prosthesis, and managing large multi-faceted projects, such as the design of an F1 car. Based on fundamental scientific knowledge and engineering (...)</p>

Science in Perspective (SiP) (2 credit points) is an integral part of the curriculum at ETH Zurich. It opens up new perspectives in natural and engineering sciences and teaches students to understand and critically question the correlations between scientific knowledge, technological innovations, cultural contexts, individuals and society.
