Blood Lipids. Increased serum lipid levels have not been clearly related to the overall incidence of stroke in individual population studies, and a meta-analysis of lipid-lowering trials found no benefit in terms of stroke risk reduction. 20 However, these studies were heterogeneous in terms of agents used, degree of cholesterol reduction, and diagnosis of stroke.

Shaan Raza, M.D. - Neurosurgery Faculty | MD Anderson ...

The external ventricular drain (EVD) is a small tube surgically inserted into the ventricles of the brain, which drains cerebrospinal fluid (CSF) (Fig. 1-12). The tube is connected to a device that measures the amount of this fluid. This procedure is used when the ICP is elevated, and the drain may be clamped for short periods of time by nursing only.

Anterior cerebral artery | Radiology Reference Article ...

Insertion of an External Ventricular Drain (EVD) is arguably one of the most common and important lifesaving procedures in neurologic intensive care unit. Various forms of acute brain injury benefit from the continuous intracranial pressure (ICP) monitoring and cerebrospinal fluid (CSF) diversion ...
