Student Projects | Science Fair Central

Whether you are doing a science fair project, a classroom science activity, independent research, or any other hands-on science inquiry understanding the steps of the scientific method will help you focus your scientific question and work through your observations and data to answer the question as well as possible.

Science Fair Project Steps Discovery

After analyzing the data, the next step is to draw conclusions. Do not change the hypothesis if it does not match the findings.The accuracy of a hypothesis is NOT what constitutes a successful science fair investigation. Rather, Science Fair judges will want to see that the conclusions stated match the data that was collected.

Steps of the Scientific Method - Science Fair Project ...

Some science fair projects are experiments to test a hypothesis. Other science fair projects attempt to answer a question or demonstrate how nature works or even invent a technology to measure something. Before you start, find out which of these are acceptable kinds of science fair projects at your school.

Steps to a Successful Science Fair Project

Steps to Prepare a Science Fair Project. 1. Select a Topic: See the list of projects and read What Makes a Good Project?.Remember a Science Fair Project is a test you do to find an answer to a question, not just showing what you know about something.

Science Fair Central | Discovery Education

8th grade science fair projects tend to involve the scientific method and designing an experiment and not making models or explaining processes. You'll be expected to present data in the form of tables and graphs. Typed reports and posters are the norm (sorry, no handwritten text). You should do the project yourself, rather than enlist heavy-duty help from a parent or older student.
