Variable - Any part of an experiment that can vary. Independent Variable - The part of the experiment that is manipulated or changed by the

Identify the Controls and Variables - The Biology Corner

Controlled variables are quantities that a scientist wants to remain constant, and she or he must observe them as carefully as the dependent variables. For example, in the dog experiment example, you would need to control how hungry the dogs are at the start of the experiment, the type of food you are feeding them, and whether the food was a type that they liked.

Bart Simpson Controls And Variables With Answers

It's important for a scientist to try to hold all variables constant except for the independent variable. If a control variable changes during an experiment, it may invalidate the correlation between the dependent and independent variable. When possible, control variables should be identified, measured, and recorded.
