There are 2 values of scientific notation in the number given and they are:- $437100 = 4.371 \times 10^5$ in scientific notation $0.00000000006 = 6.0 \times 10^{-11}$ in scientific notation

Scientific Notation Questions and Answers | Study.com

In scientific notation, the digit term indicates the number of significant figures in the number. The exponential term only places the decimal point. As an example, $46600000 = 4.66 \times 10^7$ This number only has 3 significant figures. The zeros are not significant; they are only holding a place. As another example, $0.00053 = 5.3 \times 10^{-4}$

Answers about Scientific Notation
