Serotonin syndrome - Wikipedia
Exposure to organophosphate insecticide can cause acute pancreatitis. Scorpion and snake bites may also be causative; in Trinidad, the sting of the scorpion Tityus trinitatis is the most common cause of acute pancreatitis. Hyperstimulation of pancreas exocrine secretion appears to be the mechanism of action in both instances.

Ethylene glycol poisoning is poisoning caused by drinking ethylene glycol. Early symptoms include intoxication, vomiting and abdominal pain. Later symptoms may include a decreased level of consciousness, headache, and seizures. Long term outcomes may include kidney failure and brain damage. Toxicity and death may occur after drinking even a small amount.

PubMed
Snakes do not generally attack human beings unless provoked. However, once bitten, a wide spectrum of clinical manifestations may result. The emphasis should be on early and adequate medical management. Delayed medical management and lack of public awareness results in prolonged hospital and ICU stay of the patients.
