Complete the table about factors that influence ecosystems.

Name Date Communities, Biomes, and Ecosystems  
Aquatic ecosystems contain several types of organisms that are grouped by their location and by their adaptations. Three groups of aquatic organisms include plankton, nekton, and benthos. Plankton are the organisms that float near the surface of the water. Two types of plankton are microscopic plants called phytoplankton, and micro-scopic animals called zooplankton. Phytoplankton produce most of the food for an aquatic ecosystem.
