A Parent's Guide to Understanding Sensory Integration

Each child reacts to sensory information differently and sensory issues are very complex because a child's sensory systems could be a mixture of over reactive, under reactive, or typical. They could be under responsive in one area like proprioception processing and over response to another like processing tactile information. A trained occupational therapist can determine which of a child's sensory systems are over reactive and under reactive to sensory information.

Sensory Processing Disorder: Causes, Symptoms, and Treatment

As a music, movement and drama teacher for 25 years (1976-2001), Carol observed many out-of-sync preschoolers. To help them become more competent in their work and play, she began to study sensory processing and sensory integration ("SI") theory.
